

## DISTORTING MIRROR 18886

### CONTENTS

1 x Distorting Mirror

**Please note:** no fixtures are included as these will depend on the construction of your wall.

### INSTALLATION

Please purchase appropriate fixtures (e.g. screws and wall-cups) separately, bearing in mind the following:

- The mirror weighs approximately 0.8kg
- The wall and fixtures must be capable of holding this weight
- There are two recessed holes in two opposite sides of the panel – make sure the screws or fixings used are sunk into the recess – no fixture should be left proud where it could 'catch' on someone's hand during use
- The mirror sides with the holes in are 13mm deep
- For indoor use only
- Make sure the mirror is at a suitable height i.e. where the client can comfortably see their reflection

### USE

The mirror could be wall mounted, hand-held or used on a stable table top – it can be stood up on either of its wider sides. Whichever positioning is used, make sure the mirror is stable and safely positioned.

### CARE & MAINTENANCE

Wipe clean using a clean, very slightly damp cloth.

If wall mounted, periodically check that the mirror is still securely attached to the wall.

### SAFETY

Always supervise the use of this product.

### SPECIFICATION

Size: 24cm x 23.5cm x 13mm deep  
Conforms to EN71

Beech (ply)  
For 3 years and over

Metal mirror
