9. Starting Up

- Wall-mount using appropriate fixtures

10. Detailed Description

Glows under Ultra Violet light and is extremely tactile, and stimulates the senses. Install in a darkened environment with an UV light nearby.

11. Safety

- Always supervise the use of this product.
- Exposure to UV light should be limited – a maximum of one hour for adults and five hours for children a day (assuming that the UV source is at ceiling height). If the user is to continually stand at the light then exposure should be limited to one hour.

12. Technical Specification

Size: 120 x 100 cm
Weight: approximately 25kg

13. Installation

1. Choose a safe and suitable location for your panel. The panel is ONLY to be used indoors, in dry environments.
2. No fixings are included in this product for the wall. When fixing it to a solid enough wall please consult a suitably qualified professional builder or from an estates department to understand the construction of the wall the panel is to be fixed to, so that the correct fittings can be used. There are no keyholes on the back of the panel.
3. Attach fixings such as mirror plates to the back of the panel. Check the fixings e.g. mirror plates you buy can easily support 25kg. You may wish to attach two mirror plates to the back of the panel at the top and two on the back at the bottom. Since the panel does not house any electrical components, there are no places to avoid attaching the fixings to.

14. Care and Maintenance

- Wipe the exterior of the Panel with a clean, soft and very slightly dampened cloth. Do not allow the Panel to become wet.
- Do not strike the Panel – handle it with appropriate care.

15. Troubleshooting

Not applicable
