

Our supplier (the manufacturer) of the product(s) listed below has supplied a statement of Safety and Conformity:

21163 Small CardioWall

21171 Large CardioWall

The CardioWalls are designed and manufactured in the UK. All individual components not of the manufacturer's design including power supplies are manufactured in accordance with relevant safety standards and are certified by their respective manufacturers.

Components designed and assembled by the manufacturer comply with the low voltage directive, CE and other relevant safety legislation. The manufacturer also follows best practice for light induced epilepsy and British Standards for equipment design.

Components manufactured by third parties to the manufacturer's design conform to relevant safety legislation.

The CardioWall has been designed not to cause any EMC issues (it does not contain components that typically cause interference with other equipment).
