## Our Snoezelen® Trademark and what it means

In the late 1970s pioneer therapists Jan Hulsege and Ad Verheul experimented with a sensory tent at the DeHartenburg Institute. The term Snoezelen® was coined soon after, contracting the Dutch words “snuffelen” (to seek and explore) and “doezelen” (to relax).

Through years of experience Rompa® has developed a range of products and created bespoke environments based on the principles of Snoezelen®, becoming the leading UK provider before developing key partners around the world. Rompa® also owns the trademark for the name Snoezelen® when applied to products. You know you are buying quality when you buy a Rompa® Snoezelen® product

The principles and benefits of Snoezelen® remain hugely significant to individuals with a range of needs all over the world.

Snoezelen® continues to:

- Provide meaningful multi-sensory spaces and activities
- Reduce anxiety and offer calming solutions
- Build self-esteem
- Focus on the individual with a person-centred approach
- Respect each person's choices, needs, pace and preferences

“Occupational Therapy at Help for Heroes has the advantage of a well-resourced sensory room supplied by ROMPA®, in our Tedworth House Recovery Centre. It is used to support our wounded, injured and sick Armed Forces veterans who have been injured as a result of their military service. The sensory room is a calm, relaxing space to deliver individualised sensory experiences and encourage relaxation. Sleep disturbances are a substantial issue for our ex-service men and women and the positive impact the sensory room can have on our veterans' ability to switch off is significant. Without the sensory room we wouldn't be able to deliver such an individualised approach and the feedback we get from the beneficiaries is universally positive!”

That is why our range continuously grows to include budget-friendly options as well as deluxe and highly

interactive offerings. These options tend to have less functionality than some of our other products, but are nonetheless valuable for providing multi-sensory input. These products may be of special interest to families who have experienced the benefits of multi-sensory environments in schools, hospitals, clinics or other large settings and who wish to replicate these benefits at home on a more modest scale.

These products also make great gifts for families for birthdays and Christmas

The stream of bubbles makes a gurgling sound and there is the hum of the air pump.”

We couldn't be more pleased. We have only had cheap tubes before this one and the difference is astounding. When we first turned it on we all took a gasp it was so beautiful. It's so bright and vibrant. The actual bubbles are huge. The gurgling and vibration are very soothing. It's extremely sturdy and well built and shouts high quality product. ROMPA® exclusive

#### Must be used with:

- Fibre Optic Spray
- Milky Way Mats
- Shimmering Curtain
- Bamboo Fibre Optics
- Star Ceiling Circle
- U V Fibre Optic Spray

## Uses of ROMPA® Fibre Optics

1. To provide visual stimulation and facilitate safe access to light, including amongst visually-impaired users and those with PMLD – the fibres can be safely held
2. For learning opportunities e.g. colour recognition (the colour changes dynamically) as well as colour matching and understanding cause/effect when used with controllers.
3. To provide tactile stimulation – the soothing weight of a harness across the lap or stroking the tips across the hands, arms etc. like a brush. Some fibres are textured, such as our Bamboo Fibre Optics
4. To provide sensory input to immobile and bed-bound users through ceiling-mounted Clouds, Panels, Circles and Chandeliers. Using a fan near suspended strands to make these move gently can increase the visual effect.
5. To separate off areas and visibly create zones within a space using Combs and Curtains. Users can feel immersed and safely enclosed in these areas
6. To maximise space – fibre optics can be threaded into carpets – we have options for floors, walls and ceilings
7. To calm, soothe and encourage relaxation – through softly changing colours and by providing a distraction from anxieties and discomfort
8. To help individuals on the Autism spectrum to concentrate and improve attention
9. To allow choice and control and so empower users (fundamental aims of Snoezelen®) through use with a variety of controllers, including a microphone. Individual strands can be used or whole harnesses, again facilitating choice and a person-centred approach.
10. To encourage motor skills and exploration – strands can be fanned out, threaded through loosely-knitted items, draped over the body, wrapped around the body and fingers can be passed through the tails

RU020127 8 beam system

RU020128 4 beam system

"A valuable resource for customers using our service at Goscote Centre. It provides multiple benefits where our customers can explore the sensory environment via the use of interactive beams. Uploading photographs personal to the individual using the system creates a unique experience which can be comforting, whilst enhancing learning and play. The sessions are tailored and personalised to meet individual need which is an objective we aim to achieve throughout our day to day service delivery. We use our system in many ways e.g. to develop interactive skills within small groups to encourage the users to take turns to activate the beams. For customers who benefit from visual stimulation seeing images that change as a result of their actions develops their understanding of cause and effect".

*Emma Partridge, Senior Reablement Officer, Day Opportunities & Employment Adult Social Care*

"The system has been a very accessible and exciting for our pupils. It is very responsive to the smallest movement so even our more physical disabled pupils have been able to produce sound and contribute to a greater sound installation, for example, our iPad Orchestra. Pupils were very keen to give it a go and experiment with the sound effects".

*Ellen Croft, PMLD Curriculum Leader, Leicester*

"Excellent for immediate engagement in a huge range of activities that can cover pretty much any area of the curriculum. For first-time musicians it can be used as an errorless method to explore an instrument or for those struggling to engage in maths, it can be subtly woven into numeracy-based activities... Easy to use which enables all the staff, regardless of their IT capabilities ... One of the greatest features is that it can be completely customised to suit the needs of a wide variety of learner profiles... Our learners have loved using the Optimusic system and are also realising the health benefits as 'Chase the Beam' has become enormously popular".

*Chris Buckley, Head of Education, School in Seaford*

"We use our Opti-music in all our themes created within our Curriculum Sensory Space.

These have included themed sessions such as the circus where students had the opportunity to sit or lay in a sensory swing and move around with batons or stick on pads to break the beams making various circus themed noises whilst pretending to be Acrobats. On the Farm - students had great fun taking turns to guess what animal would appear on the screen and what noise they could hear when breaking the beams. In our Native Americans theme the students had the opportunity to make up tunes using the drum programme and each took turns breaking a beam matching colour symbols to colour beam to create a drum beat for a pretend Pow Wow. The Opti-music has become a valuable piece of equipment in our Curriculum Sensory Space and has given our students the opportunities to develop both fine and gross motor skills, concentration skills, social skills and most importantly independence by being able to explore and create to their own level of abilities".

The systems offered here by ROMPA® have been specifically developed for the special needs market. Created on the foundations of a sound understanding of disabilities, these are purposeful first and foremost, and not simply adaptations of audio visual products for able-bodied users. Ask us for a demonstration of the Mobile Interactive Floor and you'll be in no doubt why this is the best system available.

Wonderful for therapy, education and entertainment for children, adults and older adults. Combines the responsiveness and activity opportunities of interactive projection with the palpable experience of sand for a highly multi-sensory experience. Interactive augmented reality allows users to transform sand into the earth's surface with lakes, mountains, volcanoes and valleys; to dig up dinosaur fossils; to play 'football' and much, much more. Loose materials such as sand allow imaginative play and creative activity whilst providing tactile sensations that promote fine motor skills, tactile perception and hand-eye coordination.

White frame as standard - other colours available upon request. Includes:

- Table frame with metal reservoir for sand, laminated board top (to turn this into an interactive table), additional legs (to adjust the height) and projector arm
- Projector with 3D depth sensor, USB and HDMI cables
- Marble sand (recommended by therapists for motor skills development as especially mouldable)
- 94 wooden sensor objects – for the Interactive table games
- Wireless keyboard
- Software featuring activities for sand and table.

190kg, including 98kg of marble sand. Supplied in a crate. We recommend that this product is professionally installed as set up requires some time and competence.

"This is a versatile interactive tool which can be adapted to accommodate different levels of physical and cognitive ability. Largely suitable for children and young people but will also appeal to older teenagers. The interactive table top allows for educational opportunities such as spelling and reading challenges which encompass hand eye co-ordination and object recognition. More challenging table top games include designing a city in which the user can include objects such as buildings to challenge topographical orientation and problem solving. All these activities can be undertaken one to one or as a group activity to foster collegiality and team work.

The sand box is an additional element which extends the activities to include more tactile input. Again games offer different levels of complexity and have broad enough themes to appeal to a range of interests. The quiz games require hand eye co-ordination, scanning and searching, and problem solving. For example, seeking out buried treasure requires spotting corners of the treasure chest sticking out of the sand then digging them out whereas digging out mines requires you to seek carefully then lift the mines out gently. The lakes and mountains, and volcano programmes are excellent opportunities for collaborative play as well as strategic problem solving. These activities can also be augmented with additional items such as play figures to increase the challenges of the task undertaken.

Overall, this is a versatile tool that can be used for immersive play as well as for therapeutic interaction. The multi-sensory components increase engagement and attention as well as providing a flexible level of sensory stimulation."

*Lesley Collier, Divisional Lead/Reader - Occupational Therapy, Brunel University London*

# Sensory Profile Packs

Contents may vary subject to availability

Originally designed by the highly respected Senior Lecturer Lesley Collier of Brunel University London to manage set patterns of behaviour that may be a result of sensory processing difficulties. These difficulties may be experienced by all generations from those with no clinical problems through to those with diagnoses such as Autism, Anxiety, Learning Disabilities, Alzheimer's disease, Schizophrenia and Stroke, amongst others. Based around the Model of Sensory Processing (Dunn, 2001). To identify which sensory type you fall within the Sensory Profile will need to be completed. Each pack includes products that will provide a more appropriate level of stimulation to each of the senses, including movement (proprioceptive and vestibular stimulation). The Home Packs are intended for use by families.

### Bedside Lighting Tablet

A cost-effective and non-pharmacological aid for the self-management of sleep problems. Keeping on ordinary lamps prevents quality sleep which can lead to ill-temper and impacts on health. Switching on ordinary lamps suddenly can be startling and discomforting. Particularly valuable for older adults as it reduces anxiety, provides peace of mind and a sense of security, helps spatial awareness and can help reduce falls by avoiding the need to fumble for a light switch in the dark. Especially useful for bedrooms as a nightlight because it provides a low-level glow which allows un-interrupted, quality sleep. On waking at night this provides a focus in a room, allowing items such as spectacles, water, phone and other essential personal items to be easily identified without switching the main light on. With non-slip feet and resistance to spills. Size: 40L x 40W x 2.5cmH

L/H refers to the left hand side from the perspective of the seated user, not from the view of someone looking at the settee in front of them

Lots more Chatsworth furniture options overleaf

The Chatsworth range includes individual pieces of furniture as well as settees and corner units that can be placed together to maximise the space available. These modular pieces can be used in a variety of combinations and are perfect for waiting areas. For example, team a 3 Seat settee that has a single arm with a Corner Unit to fill a whole wall. A second settee with the opposite single arm could be added to the other side of the Corner Unit to fill 2 adjacent right-angled walls. With so many colours, sizes and sensory options to choose from, it's up to you!

To make the furniture even more comfortable and inviting-looking, why not add some scatter cushions? Choose matching colours or contrasting shades for visual stimulation.

Remember, L/H refers to the left hand side from the perspective of the seated user, not from the view of someone looking at the settee in front of them.

The bed has a wooden base and is mounted on a giant loud speaker cabinet. The bed can also be used for interactive stimulation by means of the included microphone to create your own sounds. Not intended for long-term sleep nor to be used as a permanent alternative to a bed. PVC - please specify colour choice when ordering (see page 184-185).

**Musical Water Bed**

"The bed was easy to set up with good instructions on its set up and use. The bed is a valuable asset in our sensory room serving to support, relax and stimulate children at different times. The musical aspect of the bed is especially useful for autistic children and those with PMLD who appreciate the sensory feelings coming through the mattress from the speakers below. The bed base and mattress are very well made and the speaker fitted into the bed base and amplifier and microphone supplied are of good quality and work well."

ROMPA® can design and install calming spaces for demanding environments such as schools with students with Behavioural Emotional and Social Difficulties (EBD), offenders' institutes and prisons. These installed facilities provide a robust and safe environment where individuals with challenging behaviours and aggressive tendencies have an opportunity to calm down and be encouraged to manage their own behaviours. Intended to reduce risk and potential injury, these low stimulation rooms are designed to foster the safety of the individual, peers and supervisors alike.

These spaces should only be used as part of a wider structured plan following good practice guidelines and appropriate legislation. Use of these environments should always be for a carefully monitored and minimal time, with the best interest of the individual at its heart.

"Fantastic Item for where space is an issue. We ordered this product back in 2006 for our daughter ... and it's still going strong! Really durable, tough vinyl! ... and not a rip or tear in it 9 years on! I cannot praise highly enough how sturdy the walls are once fixed ... many a time 'perched' on by us when supervising daughter ... and no dents from our weight!! It's a fantastic design that can fix into any corner, utilising your existing walls for the rear 2 sides ... It was easy to fix with the wooden brackets attached, and has stayed put all these years with no problems at all! The inner floor mat is also tough ... made from heavy duty vinyl, which velcros on to the sides to fix. All in all, this ball pool scores highly with me 11/10 ... definitely a quality item that is well made and lasts many years, as mine has proven!" *Lisa, Verified Buyer*

## Sensory Integration & Movement

Vestibular and proprioceptive senses are often overlooked beyond the “traditional 5 senses”, although they form an essential part of our day to day lives.

Proprioceptive senses process information from our muscles, joints, and other body parts to provide us with an unconscious awareness of the position of our body parts in relation to each other, other people and objects.

The Vestibular sense puts balance into our lives. It provides information about movement, gravity, and changing head positions. It tells us whether we're moving or we're still, as well as the direction and speed of our movement. We can even tell if we are vertical or horizontal – even with our eyes closed.

Combining the development of both Proprioceptive and Vestibular senses, the practice of Sensory Integration can assist in developing the ability to process this information.

## Hayley's Joy®

A clever system created originally just for Haley and now available just from ROMPA®!

Haley was a little girl who experienced challenges centering herself and focusing. Her family searched for ways to help her development and found Floortime therapy. The first challenge her parents encountered was gaining Haley's interest and attention during these interventions. With great delight they discovered that Haley's first experience on a vestibular swing proved to be exactly what she needed, and it became her most beneficial tool.

Haley's grandfather, an engineer by trade, designed and built her a portable vestibular swing, one which could be moved to any room, and used to engage Haley in therapy and developmental activities, such as puzzles and reading.

For her family, the swing provided a practical solution. For Haley, the swing provided pure joy.

Portable, practical and perfect for the Occupational Therapist on the go. Ideal for use in schools and domestic settings where a permanent frame is not viable Modular, with many accessories.

### BENEFITS

"Our On the Go Swings have become the cornerstone of two sensory-motor rooms that our therapy team established in 2 of the school districts we serve. The swings are very easy to set up and perfect for the variety of students we serve with both vestibular and core strengthening needs. The ease of set-up and take down allows us to not only transport the swings but to reconfigure the room as we add equipment and make changes to meet the needs of our students. Both of our swings have the centre rotational device allowing us to use a variety of swings that require either a single point attachment or 2 point attachment for linear movement. The safety and versatility of these swings have made them the perfect choice for our students."

With a high opening to increase the enclosed effect, please consider access into this swing e.g. Soft Play Steps. Working load: 90kg (200 lbs)

Size: 162.5cmL x 61cmW

"This swing instantly seems to attract attention from the younger child, some of whom seem drawn to this and want to feel cocooned. They love the sense of safety that this provides, and feel secure in the swing. With a smaller opening than other swings, this gives a better sense of separation and physical boundary. They have described it as their bubble. Our sessions consider therapeutic space, such as activities working in close proximity and tight space, and being able to push against flexible boundaries feeling like 'womb space'. It has therefore been a valuable swing in our Sensory Attachment Interventions too."

## TheraGym® Square Platform Swing

Provides many multi-sensory opportunities with extra stabilizing features: a hanging disk to keep the swing moving uniformly and a carpeted platform to keep clients in place. With one suspension point to allow the child to go in different planes of movement which increases the vestibular input and challenge. This hardy swing has a solid Baltic Birch wood base with a smooth edge for safety, and a soft removable carpet pad. Safety snap included. Weight capacity: 360kg (800 lbs)

Size: 72 x 72cm

"The platform swing is an essential swing in our S. I. clinic, as it allows for the child to work in different positions such as sitting, laying on their tummy or back. It is very versatile and allows for the task to be graded. We love to use the Tube Swing inside the platform to provide more postural support with gentle vestibular input. As the child improves their posture through the use of S. I., the challenges can increase and the child can lie or sit in different positions. The swing has ropes that the child can hold on to for support and we encourage the child to start to self-propel and move the swing themselves, as this is an excellent bilateral timing and coordination task, and provides proprioceptive input."

## Aroma

The olfactory sense is very powerful and emotive. Smell can trigger memories and change our mood. It enables us to identify objects and affects taste.

## 10 Reasons to choose ROMPA®'s Aromatherapy Kit

### 1. Choice

This comprehensive kit includes 12 different aromas, from Grapefruit and Bergamot, to Tea Tree and Lavender

### 2. Longevity

As you only need to use a couple of drops each time, this kit typically lasts for 2 to 3 years, if not longer. Oils are bottled just before they are despatched to us

### 3. Natural

The oils are essential oils – high quality, natural oils - not synthetic, water-based alternatives

### 4. Ethical

The oils are ethically sourced from all over the world – our supplier has established strong relationships with producers for many years, often through travelling to sites to maintain these links

### 5. Tested

The oils are tested for quality and a MSDS is available on our website

### 6. Multi-purpose

Useful for stimulating memories, encouraging appetite, massage, bathing, freshening rooms and masking less pleasant odours ... these oils can be used in many different ways. Using an oil in a fan-operated diffuser is both simple and safe.

### 7. Sensory

Despite having the quickest and most direct route to the brain of all the senses, our sense of smell is often over-looked as many of us use our sense of sight as our primary sense. In order for Multi-Sensory Environments to be truly multi-sensory, aroma should be considered with the other senses, including the vestibular and proprioceptive senses

### 8. Comforting

Our sense of smell is not only very sensitive and powerful, it is connected to mood, emotions and feelings. Aromas can transport us to our childhood and stimulate memories of loved ones and happy times. Aromas can also be used to distract during treatment and to help maintain connections with individuals when incorporated into massage.

### 9. Alternative

Akin to the values of Snoezelen®, aromatherapy can be used effectively as an alternative to medication. For example, essential oils such as Lavender and Vetiver can be used to help encourage sleep – safe avenues to explore before resorting to sedatives

### 10. On trend

Aromatherapy is coming back into vogue, notably in the USA, but also in the UK. Some perfume houses are consciously choosing to use more essential oils in their perfumes to avoid the use of preservatives.

### Smell Box

A collection of 12 different aromas to encourage reminiscence and evoke memories amongst a wide range of people. Brilliant way to prompt conversation. Aromas includes: carnation, lemon, dentist, apple, pear drops, newly-cut grass, lily of the valley, leather, marzipan, hyacinth, germolene, lavender. With storage box. ## Life Skills & Rehabilitation

We are reliant on good health and sound well-being, as well as on the many life skills we have learnt – and often take for granted - that help us every day. When our health declines or an injury compromises our daily activities, the effects are far-reaching.

This section includes a range of tools to maintain functionality, to aid recovery and to help individuals to return to their normal health and their familiar lifestyle. ROMPA® offers products for enabling, assessment and invention such as timers, equipment for writing, cutting and activities to use different grips, develop fine motor skills and build muscle strength.

## Newborns

Soft, adorable and a delight to cuddle. Realistic size and 'feel'. Even their little heads need supporting like a newborn. With beautiful attention to detail and a Velcro-sealable pouch in the back for the Heart (20327). Includes babygown and hat, but will fit into standard newborn sized baby clothes. Hand-washable. Weight: 0.8kg

## Lilly

"We initially purchased one of the dolls for a Lady living with Dementia in the home who was always talking about 'the babies'. Her reaction to the doll was overwhelming, her communication skills improved as she would sit and converse with the doll and also sing Nursery rhymes. Something that she may not have done or that we would have thought she was able to do. Subsequently we purchased a further 3 and they have had a really positive impact for our Ladies and Gentlemen living in the home, giving them the opportunity to still be able to nurture and create a sense of comfort and well-being. We also purchased a beautiful Silver Cross pram for the dolls and this encouraged people to go outside for walks in the fresh air. They are really soft and durable but also they are the weight of an average baby. Clothes are interchangeable and this helps people keep occupied with looking after them."

## Z-Vibe® & Z-Grabber™

### Tools for therapists for professional use (these are not chews)

Most people are either auditory or visual learners, but sometimes these senses are not enough and we need to consider the sense of touch. Speech and Language Therapists have been trained to use tactile input to teach clients how to lateralise their tongue, elevate their tongue tip, make a tongue bowl, close their lips, learn a rotary chew, position the articulators for sound production and other oral motor skills. Vibration provides a new level of sensory stimulation to increase awareness and to draw more acute attention to the articulators. Vibration can also be calming and organizing.

All these products are lead-, latex-, PVC-, BPA- and phthalate-free, and are for supervised use under the guidance of a therapist or trained carer. Change the Tips for work on speech and feeding skills. All Tips require a Z-Vibe® or Z-Grabber™. The Soft options are made from a softer, more resilient material for those with a bite reflex and/or sensory issues.

More chewable jewellery available at [www.rompa.com](http://www.rompa.com)

### Colour Change Nee-Doh

Color Changing NeeDoh is the Groovy Glob that magically changes color with a squeeze. When you let go it amazingly changes back to it's original color. Give it a squeeze, a squish, a pull or a smush. NeeDoh will soothe your soul and soon you'll be feeling very groovy. Colour is chosen at random.

## ROMPA® manufactures matting, furniture and soft play in a large range of fabrics and colours. These include:

### PVC (Vinyl)

The most durable, and popular, of all our fabrics. Extremely hard-wearing, PVC is easy to clean, water-resistant and treated with fungicide. Latex- and phthalate-free, this strong fabric has a polymer coating on both sides, making it rigid and helping products to maintain their shape. Our PVC has a 'Cape' or subtly textured and fungicidal finish, and is available in a huge spectrum of colours and tones. This extensive choice lends itself well to two-tone finishes, such as purple with lilac accents, or sky blue and light blue combinations.

### Ideal For:

- *Wall and Floor Mats (page 85 to 87)*
- *Ballpools and Wedges (page 88 to 90)*
- *Soft Play Products (page 84 to 96)*
- *Water Beds and Furniture (page 75 to 77)*

### Polyester

Slightly warmer to the touch than PVC, and more flexible. This makes Polyester best-suited to products which allow clients to sink into them and which mould to the user's shape.

### Ideal For:

- *Mini Floppy Islands (page 79)*
- *Squashy Seating (page 79)*
- *Sensory Cuddles (page 79)*
- *Splodges (page 79)*

### Faux Suede

Arguably the softest of our fabrics, and is similar in texture to suede. More akin to fabrics used in domestic furniture, this supple fabric is water-resistant, extremely comfortable, stain-resistant and antibacterial. Available in subtler shades of colour than PVC and Polyester, this fabric may be more age-appropriate for older adults. Although durable, this fabric has a short pile and is less hard-wearing than PVC. As such, it should not be chosen for areas of heavy use such as step treads or floor cushioning.

### Ideal For:

- *Supa Squashy Sofa (page 79)*
- *Positioner (page 74)*

### Polytran

Extremely pleasant to the touch, this soft, matt-finish fabric is perfect for products used for long periods of time. Latex- and phthalate-free, as well as flexible, this fabric is a knitted polyester with a polyurethane coating. This fabric has been specially selected for our Pos-Pod™ Modular Multi-System.

Products typically made in Polytran include wedges, rolls and cushions intended for positioning.

Fabrics used by ROMPA® have been selected for their high quality, reliability, durability and suitability for our marketplace. Our fabrics are complimented by the use of high quality fillings such as bead and foams of various densities to allow us to manufacture an extensive range of soft and pliable or firm and supportive products. All our fabrics (and the products made from these and our fillings) meet appropriate fire-retardancy standards.

Our attention to detail is second to none – from our high quality non-slip fabric to the colour-matched threads that are used to hand-finish our products, ROMPA® has earned its reputation for consistently excellent standards.

This applies to our standard products, as well as to any bespoke solution requested by our customers. The colours shown here are from our standard range but we will gladly accommodate special requests for further colour options. Contact us for a fabric swatch to help you make your fabric and colour choices.

## Faux Leather Fabric

Available in striking modern colours, this subtly-textured fabric is as hard wearing as it is stylish. Vibrant yet tasteful, this strong fabric is a combination of PVC, Cotton, Polyester and PU. Fire-retardant (Crib 5), phthalate-free, anti-microbial and REACH compliant. The fabric itself is waterproof, although seams are not due to the nature of stitching.

Faux Leather Fabric can be found in the Chatsworth Furniture range. Whole pieces of Chatsworth furniture can be made in up to two colours of Faux Leather, or one colour can be selected with one colour of Textured Fabric on the sides.

Ideal For:

All the colour options are anti-microbial.

Textured Fabric can be found in the Chatsworth Furniture range. The sides of these products can be made in Textured Fabric, whilst the remainder (e.g. seat and cushions) is typically in Faux Leather.

## Snoezelen® Multi-Sensory Vehicle

Like what you see, but still not sure? Come and visit us, we'd be happy to see you. Bookings required.

Please contact us to visit our Snoezelen® or Reminiscence Showroom. Our Showrooms are based at our Head Office in Derbyshire.

Rompa®, Goyt Side Road, Chesterfield, Derbyshire, S40 2PH

### What's in it?

The vehicle contains all the typical components of a typical Rompa® multi-sensory room but this one is installed in a large vehicle that we can take to shows and events up and down the country.

We think this will prove a great way to bring the concept of Snoezelen® sensory environments to a wider audience and demonstrate the immersive quality of a Rompa® sensory room.

Our Snoezelen® Multi-Sensory Vehicle is available to book out and bring to your event.

Visit [www.rompa.com/snoezelen-multi-sensory-vehicle](http://www.rompa.com/snoezelen-multi-sensory-vehicle) to enquire NOW.

### Large enough to count but small enough to care

As a responsible supplier and manufacturer we have continuously updated ethical and environmental policies. As just one example, we review and report packaging and waste.

### Wonkey Donkey

Rompa® are proud to work in partnership with the Wonkey Donkey Visitors Centre.

They not only provide sanctuary for donkeys but recognise the role that these beautiful animals can play for people aiding rehabilitation for illness and support those with disabilities. If you are in the area why not pay them a visit...
