Please see www.rompa.com for our extensive range of switches

9. Starting Up

- Insert 2 AA batteries, and connect a switch to the jack socket.

10. Detailed Description

Operate your switch to make Mog walk, move her head and tail and let out a gentle squeak. Momentary operation. Requires 2 AA batteries and a switch (to be purchased separately). Long fibres – not suitable for those who mouth.

11. Safety

- Supervise the use of this product.
- Mog has long fur and is not suitable for those who mouth.

12. Technical Specification

Size: 19L x 22W x 10cmH
Power: 2 x AA batteries

13. Installation

1. Turn Mog upside down. Using a cross-head screw driver open the battery compartment.

Insert two AA batteries, observing the polarity indicated.

2. Close the battery compartment and tighten the screw to secure in place.
2. Connect Mog to a switch (not included) via the jack socket at the end of the cable attached.
3. Activate Mog by activating the switch you have just connected.

14. Care and Maintenance

- Do not allow clients to pull on the cable.
- Do not immerse the unit in water.
- Change the batteries when operation becomes erratic.
- Remove the batteries when Mog is not in use for prolonged periods.
- Do not use rechargeable batteries, and do not mix old and new batteries.

15. Troubleshooting

Problem: *Mog will not move or make a sound*

- Make sure your switch is properly connected (pushed as far as possible into the jack socket).
- Check the batteries and replace these as required.
- Make sure your switch is not faulty – check it with another switch-adapted product.
