9. Starting Up

There are no short-cuts to setting up Sensory Integration products. Read all instructions thoroughly before installing and using the Economy Bolster Swing and keep the instructions in a safe place.

10. Detailed Description

One point of attachment! This versatile nylon padded horizontal swing allows you to create a variety of progressive balance and core exercise activities. Can be used with two points of attachment: 2 safety snaps and 182cmL rope included. Working load: 136kg (300lbs).

11. Safety

Always supervise the use of this product.

This product is not a toy. Any activity involving motion, height, or rotation may cause serious injury. This product is intended for use under the supervision of trained professionals.

- Do not exceed the 136kg (300lbs) working load.
- This equipment is intended for professional clinical use only under supervised conditions by a trained specialist. Use without proper supervision or knowledge is potentially dangerous and should not be undertaken or permitted. Before using these products, make sure you know your limitations and that of your equipment.
- Client safety is dependent on the appropriate choice of activity to match, yet challenge physical ability.
- The layout of the activity area, proper installation and maintenance of equipment is critical – use this swing appropriately and safely.
- Do not use or store outside.
- Take time to familiarize yourself with the use and maintenance of this equipment before using and file these instructions in an accessible location. These instructions must be read and be familiar to anyone who is using this equipment.
- All parts of the Safety Snap should be thoroughly checked at least on a monthly basis and before use along with all suspended equipment including the Suspension System.
- Check all points where movement occurs for wear of any kind. All wear points should be checked regularly and recorded on the maintenance checklist enclosed to monitor their condition. Worn parts should be replaced or repaired immediately.
- Floor mats of an appropriate thickness should be positioned properly underneath and around all suspended equipment. Wall matting/cushioning should also be considered if appropriate.
- Steel safety snaps are recommended as aluminium Safety Snaps wear more quickly.
- The suspension point must have a clear distance of at least 6 feet from walls and other obstacles.
- Risk assess before use. Inspect equipment for wear and tear before use and discontinue use if any doubt.
- Your client may require assistance to enter and exit the swing. Assess how to transfer safely before attempting use.

12. Technical Specification

Size: rope 182cmL; bolster 127cmL x 25cm diameter; ropes 106.7cm apart

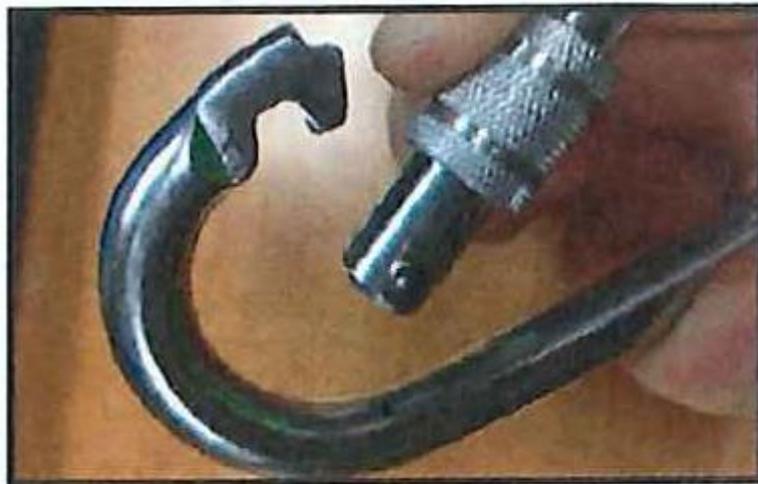

Working load: 136kg (300lbs)

This product has a zip for manufacturing purposes only which is sealed closed.

13. Installation

- Please ensure that you ascertain from the appropriate authorities that the fixing point is suitable and will hold up to 200kg load at up to a 45° angle in any direction.
- Please check equipment immediately for any damage that may have resulted during shipping. If any damage has occurred, please contact ROMPA® immediately.

1. To open the Safety Snap, turn the locking nut clockwise as far as possible.

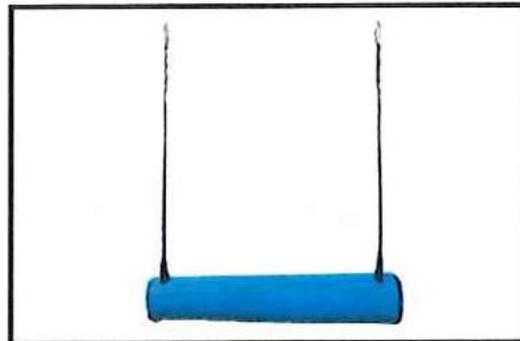

To close and lock the Safety Snap, turn the locking nut anti-clockwise as far as possible. Each Safety Snap is intended for use with one piece of equipment and / or one accessory.

2. Attach the Economy Bolster Swing from the two Safety Snaps included to either one or two suspension points.

OR

3. Make sure the swing is set up safely and securely before use, and that your suspension system will support the working load.
4. You may wish to use a Height Adjustment System (not included but available from ROMPA®).
5. A Safety Rotational Device must be used for all activities, not just for rotation, as this helps prevent wear on the suspension point (not included but available from ROMPA®).
6. All suspended equipment requires a minimum ceiling height of 2.5 metres/8 feet.
7. Ensure that suspended equipment is clear of other obstacles
8. A clearance of 1.8 metres/6 feet around the hanging item must be observed
9. The distance between the floor and the product should be 1'.
10. Make sure that all adjustments are secure and tight before use.
11. Check all materials, stitching and connections for wear before using.

14. Care and Maintenance

1. Check for client allergies before using any chemical cleaners.
2. Wipe down with a soft cloth dampened with a mild soap solution and allow to air-dry naturally. Do not use large amounts of liquid and do not immerse any part of this swing in water.
3. Use and store in a dry environment.
4. Do not attempt to open the zip on this product – it is not intended to be opened.
