

MADE IN BRITAIN

Neo wall - a unique lava lamp for walls

Brilliant in multiples in sensory and stress relieving environments

The only wall mounted lava lamp available anywhere. Neo wall is elegantly designed and made from solid cast and polished metal metal with fresh white accents. It can be mounted at children or adult height and comes complete with fixing plate and cable grip to make it both easy to mount and safe in situ. It is low voltage and is not too hot powered by a long lasting 25w halogen capsule bulb. It is fixed together as one unit and has shatter-proof glass making it suitable for use in a busy environment such as schools, sensory rooms or areas for relaxation. Replacement bulbs and bottles are available and are easy to change with the use of the Allen key, provided.

Available: Autumn 2017

MULTI SENSORY ENVIRONMENTS

Neo lava lamps are a great addition to any multi-sensory environment. They can be used to encourage relaxation and reduce aggressive behavior. Also to focus attention, increasing concentration and promoting intellectual activity.

VISUAL TRACKING

Constantly moving lava shapes provide a point of focus for eye-tracking work to improve visual development. Helpful for the management of Autism and Brain Trauma.

CALMING

Neo is a great tool for promoting calming relaxation. Choose blues, greens and violets to calm the mood. Good for working with those with Insomnia, Epilepsy, ADHD and Autism.

SOFT LIGHT

Neo produces a soft gentle glow perfect for gently waking up, or as a safe night light. Its soft light does not hurt the eyes of those with photosensitivity to light or those suffering from Autism with hyper-sensitivity to light. It is also useful for helping to manage Dementia, Brain Trauma, Chronic Pain, Epilepsy and Insomnia.

VISUALLY STIMULATING

Colourful lava lamps with ever-changing shapes can help stimulate the visual sensory system activating different perception areas to support overall development for those that are neurologically impaired. Helpful managing Autism, Brain Trauma, Downs Syndrome, Dementia and Light Sensitivity.

DISTRACTION

Neo helps people focus on the movement of the lava as opposed to physical pain and discomfort from medical conditions or painful physiotherapy. The lava also acts as a distraction for those with a variety of mental health issues.
