

ROMPA®

Fabric Collection & Specifications

Fabrics used by ROMPA® have been selected for their high quality, reliability, durability and suitability for our marketplace. Our PVC, Polyester, Faux Leather, Faux Suede and Palytran fabrics are complimented by the use of high quality fillings such as bead and foams of various densities to allow us to manufacture an extensive range of soft and pliable, or firm and supportive products. All our fabrics (and the products made from these and our fillings) meet appropriate fire-retardancy standards, and we can manufacture to Crib 5 and Crib 7 requirements by special order.

Our attention to detail is second to none - from our high quality non-slip fabric to the colour-matched threads that are used to hand-finish our products. ROMPA® has earned its reputation for consistently excellent standards.

This applies to our standard products, as well as to any bespoke solution requested by our customers. The colours shown here are from our standard range but we will gladly accommodate special requests for further colour options.

ROMPA® manufactures cushioning, furniture and soft play in a large range of fabrics and colours. These include:

PVC (Vinyl)

The most durable, and popular, of all our fabrics. Extremely hard-wearing, PVC is easy to clean and water-resistant. Latex and phthalate-free, this strong fabric has a polymer coating on both sides, making it rigid and helping products to maintain their shape. Our PVC has a 'Cape' or subtly textured finish, and is available in a huge spectrum of colours and tones. This extensive choice lends itself well to two-tone finishes, such as purple with lilac accents, or sky blue and light blue combinations. We can also print a range of motifs onto PVC, including your own imagery for bespoke solutions.

Products typically made in PVC include wall and floor cushions, ballpools, most soft play products, water beds, wedges and larger pieces of furniture.

Faux Suede

As its name suggests, this is arguably the softest of our fabrics, and is similar in texture to suede. More akin to fabrics used in domestic furniture, this supple fabric is water-resistant, extremely comfortable and stain-resistant. Available in subtler shades of colour than PVC and PU Nylon, this fabric may be more age-appropriate for older adults. Although durable, this fabric has a short pile and is less hard-wearing than PVC. As such, it should not be chosen for areas of heavy use such as step treads or floor cushioning.

Products typically made in Soft & Silky include the Positioner, the Sensations E Chair and the Supa Squashy Sofa.

Polytran

Extremely pleasant to the touch, this soft, matt finish fabric is perfect for products used for long periods of time. Latex and phthalate free, as well as flexible, this fabric is a knitted polyester with a polyurethane coating. This fabric has been specially selected for our Pos-Pod™ Modular Multi-System.

Products typically made in Polytran include wedges, rolls and cushions intended for positioning.

Textured Fabric

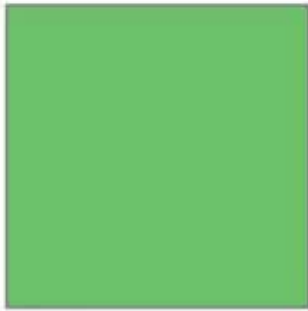

Contemporary yet classy colours with a blend of texture and softness to suit every indoor environment. Beautiful, tactile and practical. Fire-retardant (Crib 5), stain-resistant, phthalate-free and REACH compliant. The fabric itself is waterproof, although seams are not due. All the colour options are anti-microbial.

Polyester

Slightly warmer to the touch than PVC, and more flexible. This makes Polyester best-suited to products which allow clients to sink into them and which mould to the user's shape.

Products typically made in Polyester include squashy seating such as the Squorner, Supa Squashy Sofa, Mini floppy Islands and Sensory Cuddles.

Faux Leather

Available in striking modern colours, this subtly-textured fabric is as hard wearing as it is stylish. Vibrant yet tasteful, this strong fabric is a combination of PVC, Cotton, Polyester and PU. Fire-retardant (Crib 5), phthalate-free, anti-microbial and REACH compliant. The fabric itself is waterproof, although seams are not due to the nature of stitching.

Faux Leather Fabric can be found in the new Chatsworth Furniture range. Whole pieces of Chatsworth furniture can be made in up to two colours of Faux Leather, or one colour can be selected with one colour of Textured Fabric on the sides.

Fabric Specifications

	PVC (Vinyl)	Polyester	Faux Suede / Leather	Polytran
Finish	Plasticised PVC polymer direct coated onto both sides of a polyester substrate with a Cape (subtly textured) finish.	Polyurethane coated dyed polyamide substrate with a fluorocarbon finish.	Microfibre polyester base with a brushed suede effect.	Polyurethane transfer coating on a weft knitted polyester fabric. Unembossed, matt gloss level.
Cleaning	Wipe with a soft, cloth slightly dampened with lukewarm water only. No bleach. Do not dry clean.	Wipe with a soft, damp cloth. No bleach. May be dry cleaned.	Wipe with a soft, damp cloth.	May be dry cleaned but do not use trichloroethylene.
Cold Crack (°C)	Max. -15	Max. -40	Not applicable	Suited to environments between 20°C and 50°C
